JOURNAL OF THEORETICAL BIOLOGY

Chief Editor: J. F. DANIELLI
Associate Editor: L. WOLPERT

Editorial Board:
E. A. BARNARD
H. BREMERMANN
M. CALVIN
J. D. COWAN
N. GOEL
B. GOODWIN
J. MAYNARD SMITH
M. YČAS
J. Z. YOUNG

VOLUME 59

June to July 1976

ACADEMIC PRESS
London New York San Francisco

Contents of Volume 59

Number 1, June 1976

MURAKAMI, H., MORI, H. and TAIRA, S., On the Molecular Embrace of Bleomycin with Helical DNA 1

TEAGUE, R., A Result on the Selection of Recombination Altering Mechanisms 25

LEE, K. Y., BARR, R. O., GAGE, S. H. and KHARKAR, A. N., Formulation of a Mathematical Model for Insect Pest Ecosystems—the Cereal Leaf Beetle Problem 33

NICOLIS, J. S. and BENRUBI, M., A Model on the Role of Noise at the Neuronal and the Cognitive Levels 77

RESNICK, M. A., The Repair of Double-strand Breaks in DNA: A Model Involving Recombination 97

SINGH, U. N., Adaptation in Micro-organisms: Variation in Macromolecular Composition with Growth Rate 107

SMART, J. S., Statistical Tests of the Broken-stick Model of Species-abundance Relations 127

CLAY, J. R., A Stochastic Analysis of the Graded Excitatory Response of Nerve Membrane 141

SOLIMANO, F. and BERETTA, E., The Tree Graphs Theory for Enzymatic Reactions 159

NICHOLS, D. E., Structural Correlation between Apomorphine and LSD: Involvement of Dopamine as Well as Serotonin in the Actions of Hallucinogens 167

MARTIN, A. R., The Effect of Membrane Capacitance on Non-linear Summation of Synaptic Potentials 179

ABDULNUR, S. F., FLURRY, R. L., JR., and BOPP, J. M., JR., Studies of the Thyrotropin-releasing Hormone. I. CNDO/2 Studies of the Conformations of the Residues 189

WANGENHEIM, K.-H. v., A Mechanism for the Endocellular Control of Cell Differentiation and Cell Proliferation 205

SCHWABAUER, R., Enzymatic Neurons 223

LETTERS TO THE EDITOR

WOLFENDEN, R. and LEWIS, C. A., JR., A Vapor Phase Analysis of the Hydrophobic Effect 231

HESS, B. A., JR. and SCHAAD, L. J., The Aromatic Stabilization of Porphyrins 237

FRIZELL, J., A Possible Electron Dense Label for the Use in the Sequencing of DNA by Electron Microscopy 241

ROSEN, G., Existence and Nature of Band Solutions to Generic Chemotactic Transport Equations 243

HAGESETH, G. T., Activation Energy and Germination Times for Isothermal Seed Germination 247

FITCH, W. M., The Deduction of Messenger RNA Sequences from Amino Acid Sequences is, To Date, a Total Failure . . 251

Number 2, July 1976

CHOU, T-C., Derivation and Properties of Michaelis-Menten Type and Hill Type Equations for Reference Ligands 253

MOLZ, F. J., Water Transport Through Plant Tissue: the Apoplasm and Symplasm Pathways 277

ROTSHENKER, S. and PALTI, Y., The Latent Period of Anode Break Excitation in Myelinated and Giant Axons 293

KUDRITSKAYA, Z. G. and DANILOV, V. I., Quantum Mechanical Study of Bases Interactions in Various Associates in Atomic Dipole Approximation 303

JI, S., A Model of Oxidative Phosphorylation that Accommodates the Chemical Intermediate, Chemiosmotic, Localized Proton and Conformational Hypotheses 319

PLESSET, M. S., WHIPPLE, C. G. and WINET, H., Rayleigh-Taylor Instability of Surface Layers as the Mechanism for Bioconvection in Cell Cultures 331

PRESBER, W., SCHROEDER, C. and KRUEGER, D. H., The Evolution of Mutation via DNA Base Composition and Mutator Genes: A Proposition 353

GURNEY, W. S. C. and NISBET, R. M., Spatial Pattern and the Mechanism of Population Regulation 361

ROSEN, G., Chemotactic Transport Theory for Neutrophil Leukocytes. 371

RAMÓN, F., ANDERSON, N. C., JOYNER, R. W. and MOORE, J. W., A Model for Propagation of Action Potentials in Smooth Muscle . 381

VANCE, D, E., The Rate-limiting Reaction Catalyzed by a Multi-enzyme Complex—The Fatty Acid Synthetases 409

THAMES, H. D., Jr., and ELSTER, A. D., Equilibrium shakes and Oscillations for Localized Two-enzyme Kinetics: A Model for Circadian Rhythms 415

MAZANOV, A., Stability of Multi-pool Models with Lags . . . 429

McMAHON, T. A. and KRONAUER, R. E., Tree Structures: Deducing the Principle of Mechanical Design 443

MIRSKY, I. and JANZ, R. F., The Effect of Age on the Wall Stiffness of the Human Thoracic Aorta: A Large Deformation "Anisotropic" Elastic Analysis 467

TAYLOR, J., The Advantage of Spacing-out 485

LETTERS TO THE EDITOR

RAMAN, R. K., The Autonomous Cell in *Dictyostelium discoideum* 491

CHENG, C. C., Structural Similarity between Febrifugine and Chloroquine 497

Index to Volume 59

ABDULNUR, S. F., FLURRY, R. L., JR. and BOPP, J. M., Studies of the thyrotropin-releasing hormone. I. CNDO/2 studies of the conformations of the residues, 189
Action potentials in smooth muscle, a model for the propagation of, 381
Activation energy and germination times for isothermal seed germination, 247
Adaptation in micro-organisms: variation in macro-molecular composition with growth rate, 107
Advantage of spacing-out, 485
ANDERSON, N. C. (see RAMÓN, F.), 381
Anode break excitation, the latent period of in myelinated and giant axons, 293
Apomorphine and LSD, structural correlation between: involvement of dopamine as well as serotonin in the actions of hallucinogens, 167
Apoplasm and symplasm pathways: water transport through plant tissue, 277
Aromatic stabilization of porphyrins, 237
Atomic dipole approximation, quantum mechanical study of bases interactions in various associates in, 303
Autonomous cell in *Dictyostelium discoideum*, 491

BARR, R. O. (see LEE, K. Y.), 33
BENRUBI, M. (see NICOLIS, J. S.), 77
BERETTA, E. (see SOLIMANO, F.), 159
Bioconvection in cell cultures, Rayleigh-Taylor instability of surface layers as the mechanism for, 331
Bleomycin, on the molecular embrace of, with Helical DNA, 1
BOPP, J. M. (see ABDULNUR, S. F.), 189

Cell cultures, Rayleigh-Taylor instability of surface layers as the mechanism for bioconvection in, 331
Chemotactic transport theory for neutrophil leukocytes, 371
CHENG, C. C., Structural similarity between febrifugine and chloroquine (letter), 497
Chloroquine and febrifugine, structural similarity between, 497
CHOU, T. C., Derivation and properties of Michaelis–Menten type and Hill type equations for reference Ligands, 253
Circadian rhythms, a model for: equilibrium shakes and oscillations for localized two-enzyme kinetics, 415
CLAY, J. R., A stochastic analysis of the graded excitatory response of nerve membrane, 141

Deduction of messenger RNA sequences from amino acid sequences is, to date, a total failure, 251
Derivation and properties of Michaelis–Menten type and Hill type equations for reference ligands, 253
Dictyostelium discoideum, the autonomous cell in, 491
DNA, a possible electron dense label for use in the sequencing of, by electron microscopy, 241

DNA base composition and mutator genes, the evolution of mutation via: proposition, 353
DNA, on the molecular embrace of bleomycin with, 1
DNA, the repair of double-strand breaks in: a model involving recombination, 9

Effect of age on the wall stiffness of the human thoracic aorta: a large deformation "anisotropic" elastic analysis, 467
Effect of membrane capacitance on non-linear summation of synaptic potentials, 179
ELSTER, A. D., (see THAMES, H. D.), 415
Endocellular control of cell differentiation and cell proliferation, a mechanism for, 205
Enzymatic neurons, 223
Enzymatic reactions, the tree graphs theory for, 159
Equilibrium shakes and oscillations for localized two-enzyme kinetics: a model for circadian rhythms, 415
Evolution of mutation via DNA base composition and mutator genes: A proposition, 353
Existence and nature of band solutions to generic chemotactic transport equations, 243

Fatty-acid synthetases—the rate limiting reaction catalyzed by a multi-enzyme complex, 409
Febrifugine and chloroquine, 497
FITCH, W. M., The deduction of messenger RNA sequences from amino acid sequences is, to date, a total failure (letter), 251
FLURRY, R. L. (see ABDULNUR, S. F.), 189
Formulation of a mathematical model for insect pest ecosystems—the cereal leaf beetle problem, 33
FRIZELL, J., A possible electron dense label for the use in the sequencing of DNA by electron microscopy (letter), 241

GAGE, S. H. (see LEE, K. Y.), 33
Giant and myelinated axons, the latent period of anode break excitation in, 293
Growth rate, variation in macro-molecular composition with: adaptation in micro-organisms, 107
GURNEY, W. S. C. and NISBET, R. M., Spatial pattern and the mechanism of population regulation, 361

Hallucinogens, structural correlation between apomorphine and LSD: involvement of dopamine as well as serotinin in the actions of, 167
HAGESETH, G. T., Activation energy and germination times for isothermal seed germination (letter), 247
HESS, B. A., JR. and SCHAAD, L. J., The aromatic stabilization of porphyrins (letter), 237
Hill type and Michaelis-Menten type equations for reference ligands, derivation and properties of, 253
Human thoracic aorta, the effect of age on the wall stiffness of: a large deformation "anisotropic" elastic analysis, 467
Hydrophobic effect, a vapor phase analysis of, 231

Insect pest ecosystems, formulation of a mathematical model for—the cereal leaf beetle problem, 33
Isothermal seed germination, activation energy and germination times for, 247

JANZ, R. F. (see MIRSKY, I.), 467
JI, S., A model of oxidative phosphorylation that accommodates the chemical intermediate, chemiosmotic, localized proton and conformational hypotheses, 319
JOYNER, R. W. (see RAMÓN, F.), 381

KHARKAR, A. N. (see LEE, K. Y.), 33
KRONAUER, R. E. (see MCMAHON, T. A.), 443
KRUEGER, D. H. (see PRESBER, W.), 353
KUDRITSKAYA, Z. G. and DANILOV, V. I., Quantum mechanical study of bases interactions in various associates in atomic dipole approximation, 303

Latent period of anode break excitation in myelinated and giant axons, 293
LEE, K. Y., BARR, R. O., GAGE, S. H. and KHARKAR, A. N., Formulation of a mathematical model for insect ecosystems—the cereal leaf beetle problem, 33
Leukocytes, neutrophil, chemotactic transport theory for, 371
LEWIS, C. A., JR. (see WOLFENDEN, R.) (letter), 231

MARTIN, A. R., The effect of membrane capacitance on non-linear summation of synaptic potentials, 179
MAZANOV, A., Stability of multipool models with lags, 429
MCMAHON, T. A. and KRONAUER, R. E., Tree structures: deducing the principle of mechanical design, 443
Mechanism for the endocellular-control of cell differentiation and cell proliferation, 205
Membrane capacitance on non-linear summation of synaptic potentials, 179
Michaelis-Menten type and Hill type equations for reference ligands, derivation and properties of, 253
Micro-organisms, adaptation in: variation in macro-molecular composition with growth rate, 107
MIRSKY, I. and JANZ, R. F., The effect of age on the wall stiffness of the human thoracic aorta: a large deformation "anisotropic" elastic analysis, 467
Model for propagation of action potentials in smooth muscle, 387
Model of oxidative phosphorylation that accommodates the chemical intermediate chemiosmotic, localized proton and conformational hypotheses, 319
Model on the role of noise at the neuronal and cognitive levels, 77
MOLZ, F. J., Water transport through plant tissue: the apoplasm and symplasm pathways, 277
MOORE, J. W. (see RAMÓN, F.), 381
MORI, H. (see MURAKAMI, H.), 1
MURAKAMI, H., MORI, H. and TAIRA, S., On the molecular embrace of bleomycin with with helical DNA, 1
Mutation via DNA has composition and mutator genes, the evolution of: a proposition, 353
Myelinated and giant axons, the latent period of anode break excitation in, 293

Nerve membrane, a stochastic analysis of the graded excitatory response of, 141
Neurons, enzymatic, 223
Nicolis, J. S. and Benrubi, M., A model on the role of noise at the neuronal and cognitive levels, 77
Nichols, D. E., Structural correlation between apomorphine and LSD: involvement of dopamine as well as serotonin in the actions of hallucinogens, 167
Nisbet, R. M. (see Gurney, W. S. C.), 361
Noise, a model on the role of, at the neuronal and cognitive levels, 77

On the molecular embrace of bleomycin with helical DNA, 1
Oxidative phosphorylation that accommodates the chemical intermediate, chemiosmotic, localized proton and conformational hypotheses, a model of, 319

Plant tissue, water transport through: the apoplasm and symplasm pathways, 277
Plesset, M. S., Whipple, C. G. and Winet, H., Rayleigh-Taylor instability of surface layers as the mechanism for bioconvection in cell cultures, 331
Population regulation, spatial pattern and the mechanism of, 301
Porphyrins, the aromatic stabilization of, 237
Possible electron dense label for use in the sequencing of DNA by electron microscopy, 241
Presber, W., Schroeder, C. and Krueger, D. H., The evolution of mutation via DNA base composition and mutator genes: a proposition, 353

Quantum mechanical study of bases interactions in various associates in atomic dipole approximation, 303

Raman, R. K., The autonomous cell in *Dictyostelium discoideum* (letter), 491
Ramón, F., Anderson, N. C., Joyner, R. W. and Moore, J. W., A model for the propagation of action potentials in smooth muscle, 381
Rate-limiting reaction catalyzed by a multi-enzyme complex—the fatty acid synthetases, 409
Rayleigh-Taylor instability of surface layers as the mechanism for bioconvection in cell cultures, 331
Recombination altering mechanisms, a result on the selection of, 25
Recombination, a model involving: the repair of double-strand breaks in DNA, 97
Repair of double-strand breaks in DNA; a model involving recombination, 97
Resnick, M. A., The repair of double strand breaks in DNA: a model involving recombination; 97
Result on the selection of recombination altering mechanisms, 25
RNA (messenger) sequences, the deduction of from amino acid sequences is, to date, a total failure, 251
Rosen, G., Chemotactic transport theory for neutrophil leukocytes, 371
Rosen, G., Existence and nature of band solutions to generic chemotactic transport equations (letter), 243
Rotshenker, S. and Palti, Y., The latent period of anode break excitation in myelinated and giant axons, 293
